International Journal of Mass Spectrometry and Ion Processes

Subject index

Alkyl nitrate nitration
Reaction of CH_3NO_3 with resonance stabilized anions the gas-phase counterpart of alkyl nitrate nitration in solution 121
Amide
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Ammonia dimer cation
Direct ab initio dynamics and MO studies on the formation reaction of ammonia dimer cations by $NH_3^+ + NH_3$ reaction 39
Analyte–analyte interactions
^{252}Cf plasma desorption mass spectrometry of quinolinium salts and method of estimation of their intermolecular interactions with phospholipids 1

Bracketing method
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Brass
Reproducibility aspects of relative sensitivity factors for major and impurity elements in brass using secondary ion mass spectrometry 107

C_{60} molecules
High desorption–ionization yeilds of large biomolecules induced by fast C_{60} projectiles 193
Carbon monoxide
Ionization of CO molecule by electron impact 13
CF_4
Kinetic energy release of F^- desorption from condensed CF_4 following low energy electron impact 231
Charge-exchange processes
Charge-exchange processes involving ground- and excited-state O_2^+ and H_2^+ ions with H_2 and O_2 115
Charge-remote fragmentation
Electrospray/collision-induced dissociation of derivatised peptides: studies on a hybrid magnetic sector–orthogonal time-of-flight mass spectrometer 71
Cluster fragmentation
Mass distribution and multiple fragmentation events in high energy cluster–cluster collisions: evidence for a predicted phase transition 225
Cluster ions
Characterization of hydrocarbon cluster ion products by surface induced reactions 1L
Coincidence technique
Charge-exchange processes involving ground- and excited-state O_2^+ and H_2^+ ions with H_2 and O_2 115
Collision-induced dissociation
Electrospray/collision-induced dissociation of derivatised peptides: studies on a hybrid magnetic sector–orthogonal time-of-flight mass spectrometer 71
Cross sections
An investigation of electron attachment to $CHCl_2F$, $CHClF_2$ and CHF_3 using an electron-swarm mass spectrometric technique 207
Cross-section
Ionization of CO molecule by electron impact 13
Crystallinity
MeV ion sputtering of polymers: observation of a secondary ion emission dependence on the crystallinity of PEEK and PET films 7L
Cs^+-SIMS
The effects of oxygen content in Ti/Si layer systems on MCs^+ SIMS analysis 155

Density functional theory
The gas phase reactivity and theoretical structures of germanium ions generated by direct laser vaporisation 45
Derivatisation
Electrospray/collision-induced dissociation of derivatised peptides: studies on a hybrid magnetic sector–orthogonal time-of-flight mass spectrometer 71
Desorption–ionization
High desorption–ionization yeilds of large biomolecules induced by fast C_{60} projectiles 193
Diketopiperazines
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137
Direct ab initio dynamics
Direct ab initio dynamics and MO studies on the formation reaction of ammonia dimer cations by $NH_3^+ + NH_3$ reaction 39

Dissociative ionization
Ionization of CO molecule by electron impact 13
Double ionization
Ionization of CO molecule by electron impact 13
Double ionization energy
Double ionization of hexafluorobenzene: energies required to populate singlet and triplet electronic states of $C_6F_6^{2+}$ 241
Double-charge-transfer
Double ionization of hexafluorobenzene: energies required to populate singlet and triplet electronic states of $C_6F_6^{2+}$ 241
Double-focusing sector field mass spectrometer
Analysis of GaAs using a combined r.f. glow discharge and inductively coupled plasma source mass spectrometer 81

Electron attachment
Optically enhanced electron attachment by *p*-benzoquinone 177
An investigation of electron attachment to $CHCl_2F$, $CHClF_2$ and CHF_3 using an electron-swarm mass spectrometric technique 207
Electron impact
Ionization of CO molecule by electron impact 13
Electron swarms
An investigation of electron attachment to $CHCl_2F$, $CHClF_2$ and CHF_3 using an electron-swarm mass spectrometric technique 207
Electronic sputtering
MeV ion sputtering of polymers: observation of a secondary ion emission dependence on the crystallinity of PEEK and PET films 7L
Equilibrium method
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Excited states
Optically enhanced electron attachment by *p*-benzoquinone 177

Fourier transform ion cyclotron resonance mass spectrometry (FTICR-MS)
The gas phase reactivity and theoretical structures of germanium ions generated by direct laser vaporisation 45
Frank–Condon factors
Charge-exchange processes involving ground- and excited-state O_2^+ and H_2^+ ions with H_2 and O_2 115
Fringing fields
Transmission of the quadrupole mass filter in the intermediate stability zone separation mode 201

GaAs
Analysis of GaAs using a combined r.f. glow discharge and inductively coupled plasma source mass spectrometer 81
Gas phase/condensed phase
Kinetic energy release of F^- desorption from condensed CF_4 following low energy electron impact 231
Gas-phase basicity
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Germanium clusters
The gas phase reactivity and theoretical structures of germanium ions generated by direct laser vaporisation 45

Hexafluorobenzene
Double ionization of hexafluorobenzene: energies required to populate singlet and triplet electronic states of $C_6F_6^{2+}$ 241
High-energy collisons
Mass distribution and multiple fragmentation events in high energy cluster–cluster collisions: evidence for a predicted phase transition 225
Hydrogen cluster ions
Mass distribution and multiple fragmentation events in high energy cluster–cluster collisions: evidence for a predicted phase transition 225
Hyperfine coupling constant
Direct ab initio dynamics and MO studies on the formation reaction of ammonia dimer cations by $NH_3^+ + NH_3$ reaction 39

ICP–MS
Analysis of GaAs using a combined r.f. glow discharge and inductively coupled plasma source mass spectrometer 81
Ion chemistry
Negative ion chemistry of $POCl_3$ in the gas phase 35
Ion cyclotron resonance
Reaction of CH_3NO_3 with resonance stabilized anions the gas-phase counterpart of alkyl nitrate nitration in solution 121
Ion transmission
Transmission of the quadrupole mass filter in the intermediate stability zone separation mode 201
Ion–molecule reaction
Direct ab initio dynamics and MO studies on the formation reaction of ammonia dimer cations by $NH_3^+ + NH_3$ reaction 39
Ionization cross-section
A quantification method in laser-ionization sputtered

neutral mass spectrometry with a large acceptance volume of photoion detection 163

Kinetic energy release
Kinetic energy release of F^- desorption from condensed CF_4 following low energy electron impact 231
Kinetic method
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Kinetics
Negative ion chemistry of $POCl_3$ in the gas phase 35

Large bio-molecules
High desorption–ionization yeilds of large biomolecules induced by fast C_{60} projectiles 193
Laser vaporisation/ablation
The gas phase reactivity and theoretical structures of germanium ions generated by direct laser vaporisation 45
Laser-ionization sputtered netural mass spectrometry
A quantification method in laser-ionization sputtered neutral mass spectrometry with a large acceptance volume of photoion detection 163
Lower limit of reaction window
Evidence for the lower limit of the reaction window of endoergicities applicable to triple-electron-capture reactions of fast-moving doubly charged ions with atoms and molecules 133

MALDI-TOF mass spectrometer
Improved resolution for MALDI-TOF mass spectrometers: a mathematical study 19
Mass interferences
The effects of oxygen content in Ti/Si layer systems on MCs^+ SIMS analysis 155
Mass spectrometry
Optically enhanced electron attachment by *p*-benzoquinone 177
Methyl nitrate
Reaction of CH_3NO_3 with resonance stabilized anions the gas-phase counterpart of alkyl nitrate nitration in solution 121
Molecular complex formation
^{252}Cf plasma desorption mass spectrometry of quinolinium salts and method of estimation of their intermolecular interactions with phospholipids 1
MS^3
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137

N-terminal fragments
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137
Negative ion resonances
Kinetic energy release of F^- desorption from condensed CF_4 following low energy electron impact 231
Negative ions
Negative ion chemistry of $POCl_3$ in the gas phase 35
Reaction of CH_3NO_3 with resonance stabilized anions the gas-phase counterpart of alkyl nitrate nitration in solution 121
Neutral fragment reionization
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137
Nonresonant multiphoton ionization
A quantification method in laser-ionization sputtered neutral mass spectrometry with a large acceptance volume of photoion detection 163

Orthogonal time-of-flight
Electrospray/collision-induced dissociation of derivatised peptides: studies on a hybrid magnetic sector–orthogonal time-of-flight mass spectrometer 71
Oxazolones
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137
Oxygen leakage
The effects of oxygen content in Ti/Si layer systems on MCs^+ SIMS analysis 155

PEEK
MeV ion sputtering of polymers: observation of a secondary ion emission dependence on the crystallinity of PEEK and PET films 7L
PET
MeV ion sputtering of polymers: observation of a secondary ion emission dependence on the crystallinity of PEEK and PET films 7L
Peptide bond dissociation
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137
Peptides
Electrospray/collision-induced dissociation of derivatised peptides: studies on a hybrid magnetic sector–orthogonal time-of-flight mass spectrometer 71
Phospholipid
^{252}Cf plasma desorption mass spectrometry of

quinolinium salts and method of estimation of their intermolecular interactions with phospholipids 1
Phosphorus oxychloride
Negative ion chemistry of $POCl_3$ in the gas phase 35
Plasma desorption mass spectrometry
^{252}Cf plasma desorption mass spectrometry of quinolinium salts and method of estimation of their intermolecular interactions with phospholipids 1
Proton affinity
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Proton-bound dimer
The gas phase basicity and proton affinity of propionamide: a comparison of methods 93
Protonated peptides
Amide bond dissociation in protonated peptides. Structures of the N-terminal ionic and neutral fragments 137

Quadrupole mass filter
Transmission of the quadrupole mass filter in the intermediate stability zone separation mode 201
Quantification
Reproducibility aspects of relative sensitivity factors for major and impurity elements in brass using secondary ion mass spectrometry 107
Quantification method
A quantification method in laser-ionization sputtered neutral mass spectrometry with a large acceptance volume of photoion detection 163
Quinolinium salt
^{252}Cf plasma desorption mass spectrometry of quinolinium salts and method of estimation of their intermolecular interactions with phospholipids 1

R.f. GDMS
Analysis of GaAs using a combined r.f. glow discharge and inductively coupled plasma source mass spectrometer 81
Rate constants
An investigation of electron attachment to $CHCl_2F$, $CHClF_2$ and CHF_3 using an electron-swarm mass spectrometric technique 207
Reaction cross-sections
Charge-exchange processes involving ground- and excited-state O_2^+ and H_2^+ ions with H_2 and O_2 115
Relative sensitivity factors
Reproducibility aspects of relative sensitivity factors for major and impurity elements in brass using secondary ion mass spectrometry 107
Reproducibility
Reproducibility aspects of relative sensitivity factors for major and impurity elements in brass using secondary ion mass spectrometry 107
Resonance-stabilized anions
Reaction of CH_3NO_3 with resonance stabilized anions the gas-phase counterpart of alkyl nitrate nitration in solution 121

Secondary ion emission
MeV ion sputtering of polymers: observation of a secondary ion emission dependence on the crystallinity of PEEK and PET films 7L
SIFT
An investigation of electron attachment to $CHCl_2F$, $CHClF_2$ and CHF_3 using an electron-swarm mass spectrometric technique 207
SIMS
Reproducibility aspects of relative sensitivity factors for major and impurity elements in brass using secondary ion mass spectrometry 107
Space–velocity correlation
Improved resolution for MALDI-TOF mass spectrometers: a mathematical study 19
Stability zone
Transmission of the quadrupole mass filter in the intermediate stability zone separation mode 201
Surface induced dissociation
Characterization of hydrocarbon cluster ion products by surface induced reactions 1L

Time-of-flight
High desorption–ionization yeilds of large biomolecules induced by fast C_{60} projectiles 193
Titanium layers
The effects of oxygen content in Ti/Si layer systems on MCs^+ SIMS analysis 155
Triple ionization
Ionization of CO molecule by electron impact 13
Triple-electron-capture reactions
Evidence for the lower limit of the reaction window of endoergicities applicable to triple-electron-capture reactions of fast-moving doubly charged ions with atoms and molecules 133
Trochoidal monochromator
Optically enhanced electron attachment by *p*-benzoquinone 177

Volume effect
A quantification method in laser-ionization sputtered neutral mass spectrometry with a large acceptance volume of photoion detection 163
